**A1** Distribution

# Slick®

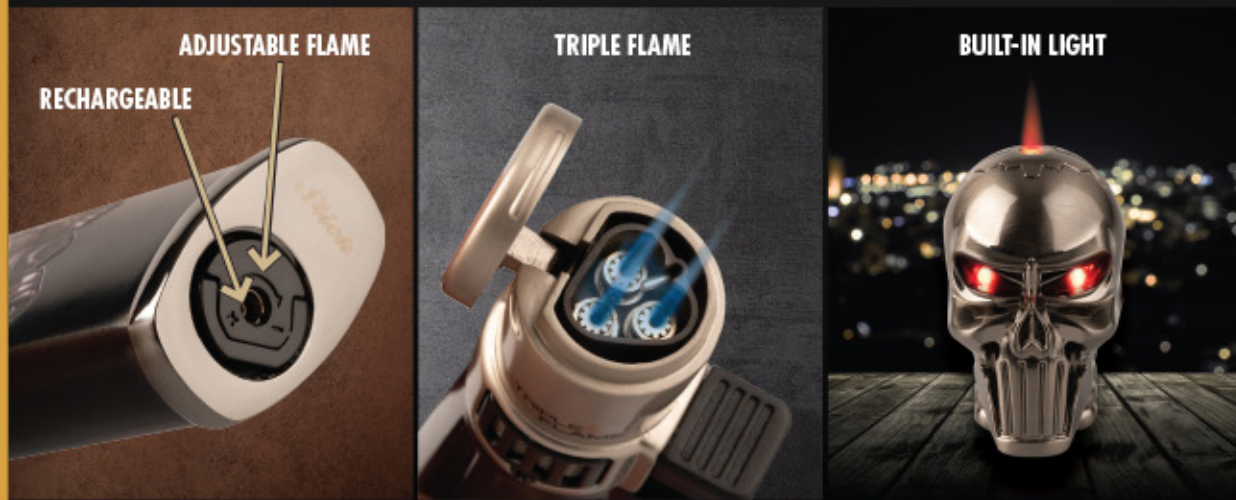

SLICK®, #1 brand of DELUXE lighter in Canada, is constantly growing since its introduction to the market in 2003. With its **premium alloy casings**, **height-adjustable** and **wind-resistant flames**, the Deluxe category is a very popular line by consumers. Customers' craze for appealing designs and artworks gives a significant advantage to this innovative line.

DELUXE lighters are **refillable** with butane, and its **mechanism is electronic**. Most lighters have a single, double and even triple torch flame and some have a **built-in light**.

SLICK® offers an entire selection of various categories: **MINI**, **EXTRAFUEL**, **WINDPROOF**, **DELUXE**, as well as accessories such as: high quality alloy grinders and premium butane.

SLICK® lighters are **100% guaranteed** against all manufacturing defects and they are all strictly controlled and tested by Canadian laboratories to meet with Canadian's lighter regulation SOR/2008-231.

## DISPOSABLES

All SLICK® disposable lighters are **refillable** for an **eco-responsible** use and have a **child-resistant mechanism**.

Addressing people's lifestyle with its diversity, SLICK® offers more than 100 funny and colorful designs in the disposable lighters family. Among the categories offered we find the **MINI**, **EXTRAFUEL**, **WINDPROOF**, **SURVIVAL** and **CANDLE LIGHT**.

The **MINI** lighters are colorful, fun and easy to slip into a pocket, while the **EXTRAFUEL** differs with its **larger gas tank**. These two categories offer regular flames.

Next comes the **WINDPROOF** category with its extra large gas tank and **windproof torch flame**. The **WINDPROOF** category offers also a **SURVIVAL** lighter with a **floatable case** that is very useful when camping or doing activities around a water point.

Finally, a new category called **CANDLE LIGHT** offers a lighter with a wind resistant torch flame perfect for lighting candles without burning your fingertips!

The different categories stand out in the market by their manufacturing quality and avant-garde electronic technology allowing the ignition of the electronic lighters with the simple pressure of a finger.

# INSTRUCTIONS

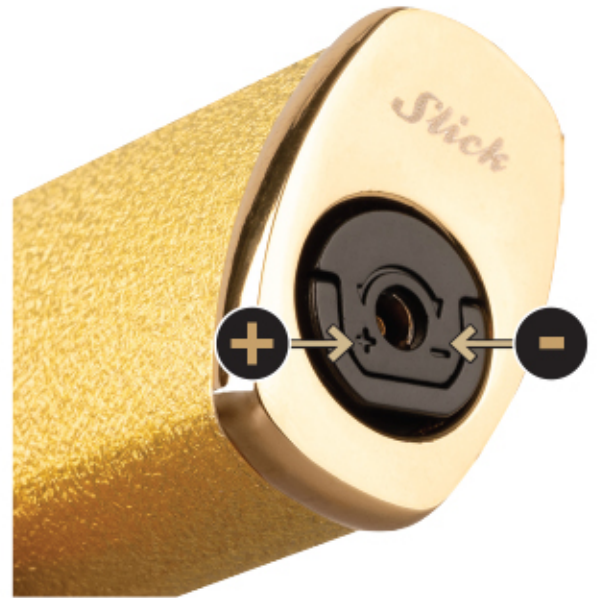

## AJUSTMENT INSTRUCTIONS

### SLICK® LIGHTERS' FLAME HEIGHT ADJUSTMENT

If a SLICK® lighter doesn't appear to work, it most probably only requires the flame height to be adjusted.

#### PLEASE REFER TO THE FOLLOWING STEPS:

1. Hold the lighter upside down.
2. Under the lighter, locate the notch to adjust flame height.
3. Use an adjustment key or a small screwdriver in the notch to increase (with the + sign) or decrease (with the - sign) the flame.

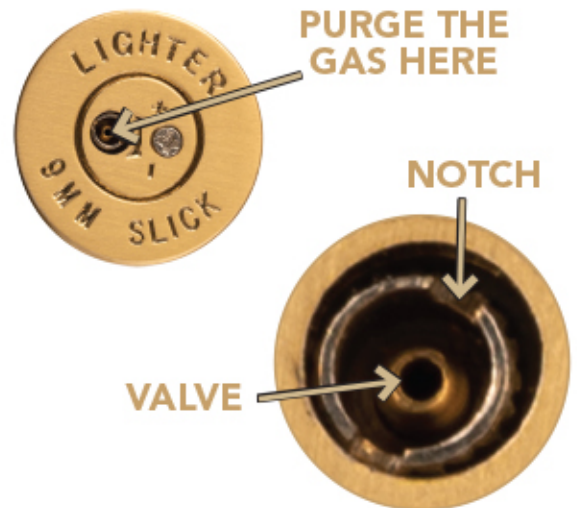

## REFILL INSTRUCTIONS

### SLICK® LIGHTERS' BUTANE GAS REFILL

All SLICK® Deluxe and disposable lighters are refillable with butane gas only. The refill valve is combined with the adjustment valve.

#### PLEASE REFER TO THE FOLLOWING STEPS:

1. First of all, please purge the gas from your lighter (what remains of it) with a pointed object (such as a pen) by pressing in the center of the valve.
2. IMPORTANT: For DELUXE SLICK® lighters, when empty, you must first decrease the flame to minimum before refilling. Since lighters have an electronic mechanism, this has the effect of resetting the mechanism before refilling.
3. FILLING: Hold your lighter upside down, as well as your butane bottle with the nozzle down.
4. Locate the refill valve under the lighter.
5. Insert the nozzle of the butane bottle into the valve of the lighter.
6. Press the bottle down for a few seconds only. The lighter tanks are small, you don't have to hold out for more than 10 seconds.
7. If the gas escapes from the valve, reposition the nozzle, you are probably misaligned or your lighter is filled to capacity.
8. When the lighter is filled, readjust the height of the flame (for DELUXE lighters, you do not have to adjust disposable lighters).
9. Since the gas is cold, it is important to wait 1 to 2 minutes before lighting your lighter.
